Revision 1

CERTIFICATE VALID FROM:

Jun 13, 2016 To Jun 12, 2017

AUDIT SCOPE:

Review of a conventional dry Storage & Distribution Center operation. The facility is approximately 24,000 square feet including the refrigerated loading dock and cooler rooms totaling approximately 20,000 square feet and operates six days a week from about 3 am to 1 am for twelve months. Cooling units have regular fans. There are no blast coolers. Most of the more than two hundred commodities this facility handles are received and shipped in the same cartons as received, that is, box-in, box-out. This company owns the product. The operation doesn't cross-dock and does some re-packing. Upon arrival, incoming trucks and product on pallets are inspected and product is immediately placed in a cooler for temporary storage. Product is separated and counted per customer order, kept on pallets which are labeled and placed in the staging area of the loading dock or loaded onto pre-cooled refrigerated trucks. The only allergen present was fresh eggs. Thirty-five male workers were present during the audit.

PRODUCTS:

PRODUCT(S) OBSERVED DURING AUDIT

Bananas, Broccoli, Cauliflower, Cucumbers, Fruits, Honeydew Melons, Strawberries, Vegetables
